Summary

My name is Ainas Puidokas and I am an IB graduate from 2022. Completing the IB programmer has provided me with a strong foundation of knowledge and essential skills that have proven to be useful in various fields. Most importantly for me, during the program, I learned programming languages such as C++, Java, and JavaFX, which enabled me to develop several applications. Currently, I am studying full-stack development at CodeAcademy, where I have learned HTML, CSS, JavaScript, Node.js, NoSQL, and SQL, and I am looking forward to learning the React framework soon. I am passionate about learning new things and staying up-to-date with the latest trends in the digital world.

Apart from my technical skills, I am an excellent communicator and have participated in various activities that have tested my ability to think critically and work with people from diverse backgrounds. I have also competed in several national programming competitions, which have helped me further enhance my programming knowledge and problem-solving skills. Although I am still young and have so much more to learn, I am confident in my ability to take on new challenges and learn new skills quickly.
